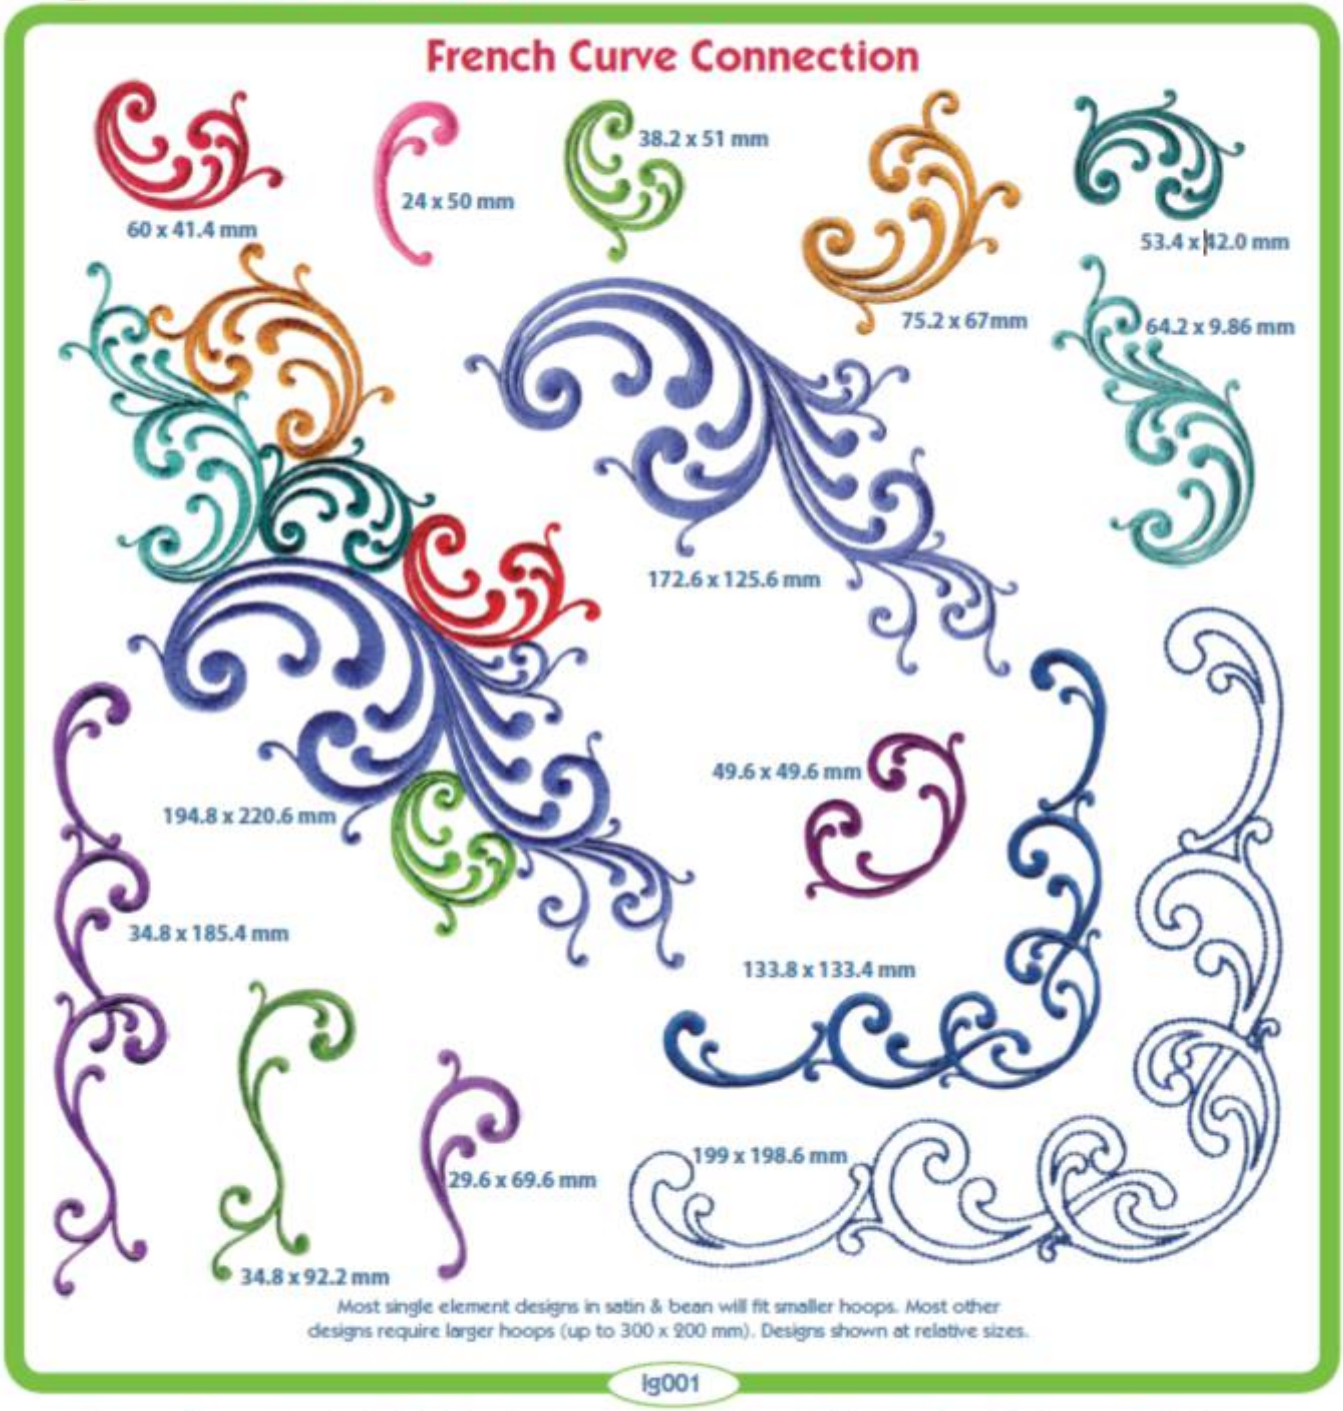
Elegant, sophisticated coordinating curves in satin and bean with a matching pair at 150% in chain and 5-pass bean. Use the latter with heavier cotton threads for a textured effect.

## French Curve Connection



Most single element designs in satin & bean will fit smaller hoops. Most other designs require larger hoops (up to 300 x 200 mm). Designs shown at relative sizes.

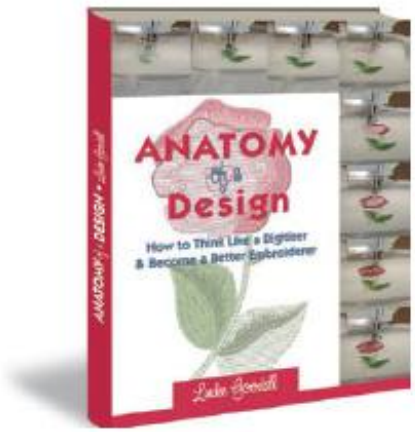
# Anatomy of a Design

## How to Think Like a Digitizer & Become a Better Embroiderer



### Want better embroidery? Read this book!

Step into the mind of an experienced digitizer and discover a whole new way to look at designs! Written in an easy-to-understand conversational tone, Lindee explains technical jargon and how it applies to both the embroiderer and the digitizer.

**Illustrated, full color, 106 total pages**
**3 embedded QuickTime animations**
**Link to designs used in book**

### Topics Include:

- Physics of embroidery
- Stitch length: effects of, minimums & maximums
- Stitch type: running, fills, satins, patterned fills, motifs
- Density
- Compensation
- Stitch angles
- Shortening
- Tie-offs
- Putting it all together
- Glossary of embroidery terms

# Quick Project 5: Hardanger Ring Bear Wedding Pillow

Create this beautiful heirloom in just a few hours! This project includes the embroidery designs and full instructions on how to embroider and sew this elegant ring bearer pillow for that special bride.

I hooped this sample with a layer of golden yellow chiffon on the bottom. This provides contrast for the cutwork areas and also prevents the rings from falling inside the pillow.

The pillow has a lapped back and a band to make it easy for a young child to carry. Ribbons secure the rings to the pillow. This project assumes basic sewing and embroidery skills. How to align designs on smaller machines is not covered in this project.

Finished size: approx. 9 x 9" Embroidered on linen and lined with a golden yellow chiffon behind the cutwork areas.

## What You'll Learn

- Two PDF files
  - Full embroidery instructions are included in a separate PDF, **How to Sew Hardanger**
- Full-size templates for all designs (end of this PDF)
  - You may want to print just these pages. Make sure you print at actual size (no page scaling) or the templates will not match actual embroidery size.
- 6 embroidery design files in multiple formats
  - One from the full Hardanger collection is included, plus one new border and one corner, both of which are modifications from design in the collection. In order to accommodate most sewing fields and to provide you with maximum flexibility for using the designs, I've included both individual designs and the entire design.

    The full design is approximately 185 x 185 mm. The design without the border is approximately 140 x 140mm. If the latter is too larger, rather than shrinking the design, I recommend using the individual pieces and either rehooping or moving the pieces closer together. You can also omit the border entirely or use a decorative machine stitch if desired. You have total creative freedom!

# Quick Project 6: Bear Paw in the Hoop Project

Piecing in the hoop makes it easy to accurately reproduce many traditional quilt blocks. If you've ever done paper piecing, you'll find the technique very similar. As far as machine embroidery goes, this is a spin-off on appliqué.

The sample shown here was featured in the October 2010 E-Club at embroidery.com with Ramona Baird. Check for a recorded version to watch the class and instructions for the project. If you watch this webinar, you'll see Ramona's technique for "spot on endless embroidery," which she used to create a border with the holly and snowflake.

This quick project only covers how to create the bear paw block.
